EV FLEET OPERATOR

HIGH PERFORMANCE DC CHARGER
SAVE TIME & OPERATIONAL COST

ENTRY PRICE
$41,990*
before GST
*T&C apply.

TITAN SERIES

☑ **DC charging speed** of 120kW / 150kW / 180kW

☑ Compatible with **all EVs**

☑ 10.4″ **LCD Touch Panel** display

☑ Become a **charge point operator** (CPO) and earn when you share your charger - Charge & Earn™

☑ Easy-to-use **QuickCharge.sg app** mobile for monitoring of charge usage

Through the proprietary QuickCharge.sg app that allows connection flexibly via 4G, Wi-Fi, and Ethernet, each charge is activated upon scanning of unique QR codes, and charging can be remotely controlled with charging history recorded.

☑ **RFID** or **QR Code** activated

☑ 2-year **warranty** (extendable)

☑ Compliance with EV charging standard
TR 25:2016
LNO granted by EMA-LTA

Before the LNO was granted, electrical installation and safety requirements to protect person and property against electrical hazards were met for connection to the EV according to accepted international practices and local conditions.

As stipulated in guidelines by the relevant authorities to ensure proper installation of EV chargers, Licensed Electrical Workers (LEW) have to be appointed to check that the EV charger is issued with LNO to ensure that it complies with the technical requirements of TR25:2016 or the relevant International Electrotechnical Commission (IEC) standards.

As a one-stop solutions provider for EVSE, QuickCharge's customers need not engage LEWs for the installation works of QuickCharge's EV chargers which are carried out by our in-house team of LEWs.

Complimentary on-site evaluation will be conducted to assess the suitability for point of installation by **QuickCharge.sg**
